All cargoes have individual or specific transportation needs. Each container type is specially geared to the requirements of different types of cargoes.

If it is your responsibility to ensure that transportation of your cargo is fulfilled, make sure the goods are packed and stowed in the right container, economically and safely.

- The **maximum payload** may be limited at times depending on road regulations at the Country of Origin and Destination.
- **Dimensions** for individual containers may vary slightly, depending on the shipping line used.

DRY VAN CONTAINER: Suitable for commodities in bundles, cartons, boxes, loose cargo, bulk, furniture, etc. (containers can be modified into hangers containers suitable to carry garments.)
